

What is claimed is:

sub.a1 >

1. A Karaoke system comprising:
 - a video image capturing device for capturing a video
 - 5 image of a Karaoke performer;
 - a Karaoke medium player for retrieving audio signals and an indicia image of a song from a Karaoke medium;
 - means for downscaling and repositioning the indicia image;
 - 10 means for compositing the downscaled and repositioned indicia image with the image of the Karaoke performer to provide an output video image;
 - a video monitor for displaying the composite output video image.

15

2. A Karaoke system as in claim 1, wherein the indicia image contains words for the song.

sub.a2 >

3. A Karaoke system as in claim 1, wherein the
 - 20 means for compositing overlays the downscaled and repositioned indicia image on the image of the Karaoke performer.

4. A Karaoke system as in claim 1, wherein the
 - 25 means for compositing removes a background of the downscaled and repositioned indicia image before overlaying the downscaled and repositioned indicia image on the image of the Karaoke performer.

09736906-121300

5. A Karaoke system as in claim 1, wherein the means for downscaling and the means for compositing are implemented in a stand-alone device separate from the Karaoke medium player.

5

6. A Karaoke system as in claim 1, wherein the means for downscaling and means for compositing are implemented as components of the Karaoke medium player.

10

7. A Karaoke system as in claim 6, wherein the Karaoke medium player is a compact-disk-plus-graphics (CD+G) player.

15

8. A Karaoke system as in claim 1, wherein the means for downscaling vertically downscales the indicia image by selectively dropping lines of the indicia image.

Sub. a3 > 9. A Karaoke video image processing device comprising:

20

a first video input for receiving from a Karaoke medium player an indicia image associated with a song being played back;

a second video input for receiving a second video image from a second external video source;

25

an electronic circuit to downscale and reposition the indicia image and to composite the downscaled and repositioned indicia image with the second video image to form an output video image;

09736900 12300
SECRET 9069E260

Sub. a 3 >

a video output for outputting the output video image for display.

10. A Karaoke video image processing device as in
5 claim 9, wherein the electronic circuit overlays the
downscaled and repositioned indicia image on the second
video image to form the output video image.

11. A Karaoke video image processing device as in
10 claim 10, wherein the electronic circuit removes a
background of the downscaled and repositioned indicia
image before overlaying the downscaled and repositioned
indicia image on the second video image.

12. A Karaoke medium player comprising:
15 a reader for retrieving data from a Karaoke medium,
the data comprising audio data and an indicia image;
an external video input for receiving an external
video image;

20 a video processing circuit for downscaling and
repositioning the indicia image and combining the
downscaled and repositioned indicia image with the
external video image to form an output video image;

25 a video output for outputting the output video
image;

an audio processor for processing the audio data to
provide an output audio signal; and

00736906 121300

Sub. 23 >

an audio output for outputting the output audio signal.

13. A Karaoke medium player as in claim 12, wherein
5 the video processing circuit removes a background of the
downscaled and repositioned indicia image before
compositing the downscaled and repositioned indicia image
with the external video image.

10 14. A Karaoke medium player as in claim 12, wherein
the Karaoke medium is a compact-disk-plus-graphics (CD+G)
disk.

15 15. A Karaoke medium player as in claim 14, wherein
the video processing circuit includes a CD+G decoder for
compositing the downsized and repositioned indicia image
with the external video image.

20 16. A Karaoke medium player as in claim 12, wherein
the video processing circuit includes a subcode processor
for receiving a stream of subcode data retrieved from the
Karaoke medium representing the indicia image and
modifying the subcode data to effect the downscaling and
repositioning.

25

17. A Karaoke medium player as in claim 16, wherein
the Karaoke medium is a compact-disk-plus-graphics (CD+G)
disk and the video processing circuit further includes a
